

111198 Foldable Live Animal Trap

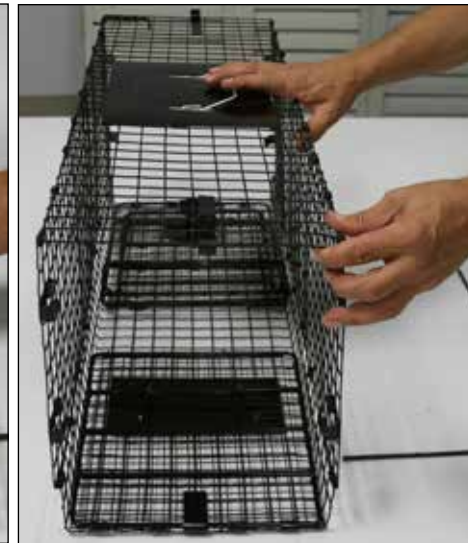

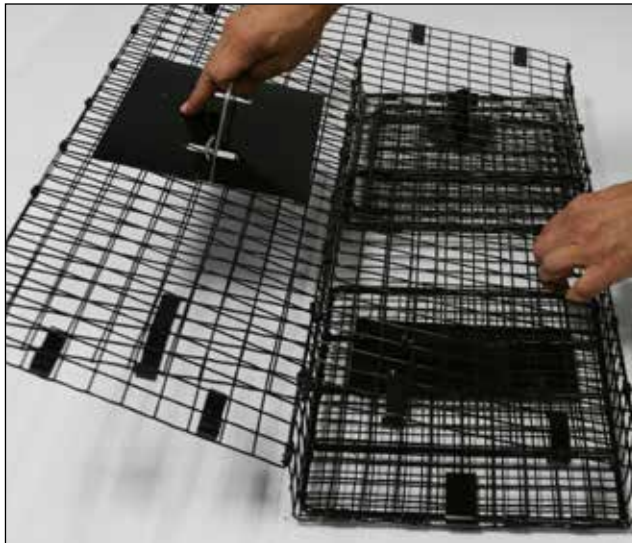

FarmTek®

Assembly is quick and easy. Follow the procedure as shown. Use side cutters or scissors to complete Step 1.

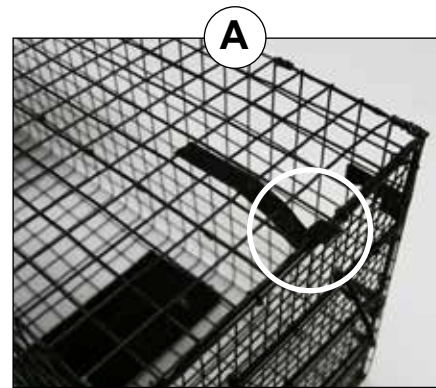

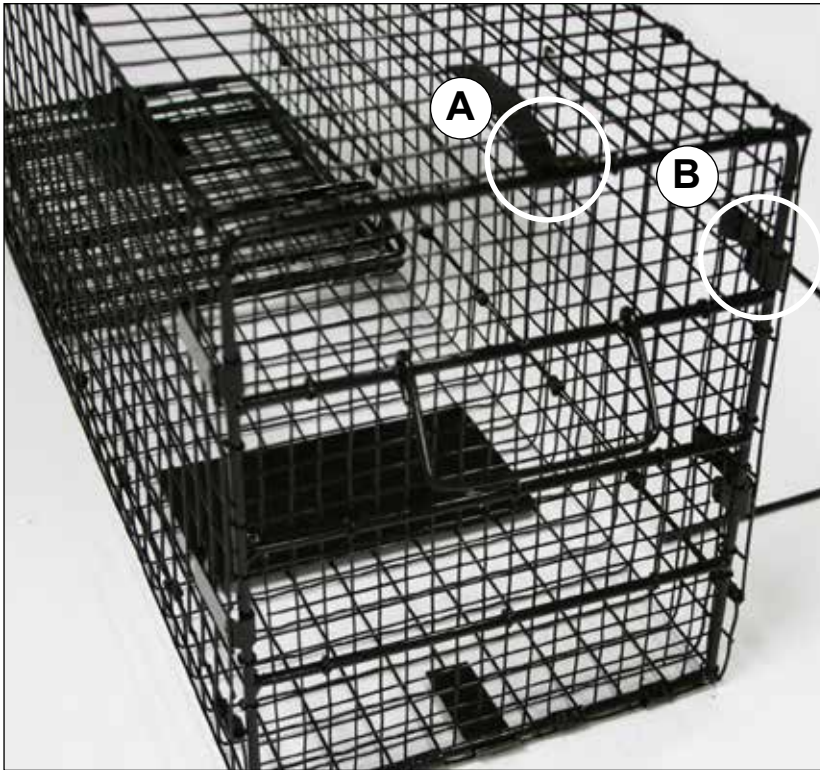

- 1 Cut and remove black plastic ties from trap.

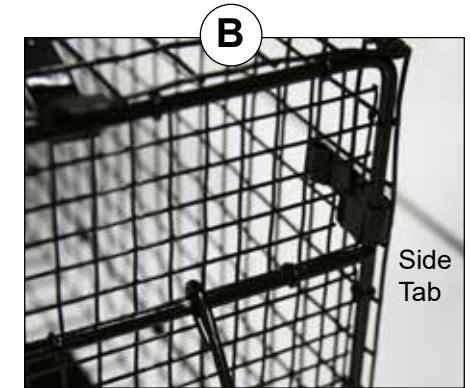

- 2 Unfold trap.

3 Carefully lift end panel and pull outward to lock into place. For added security, bend side tabs around end panel frame using a pliers.

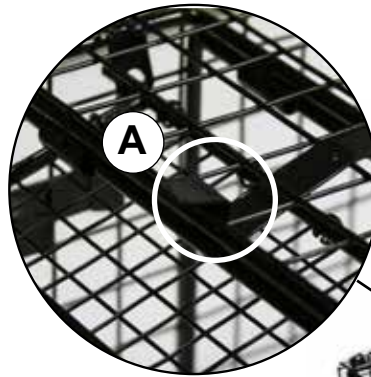

A. Verify that the spring tab (top) is pressed down behind the end panel frame to prevent the panel from being pulled or pushed into the trap.

B. For added security, bend side tabs around end panel frame.

4 Carefully lift and pull hinged trap door outward to lock trap door frame in place (A & B). Set spring door latch outside of door stop plate (C).

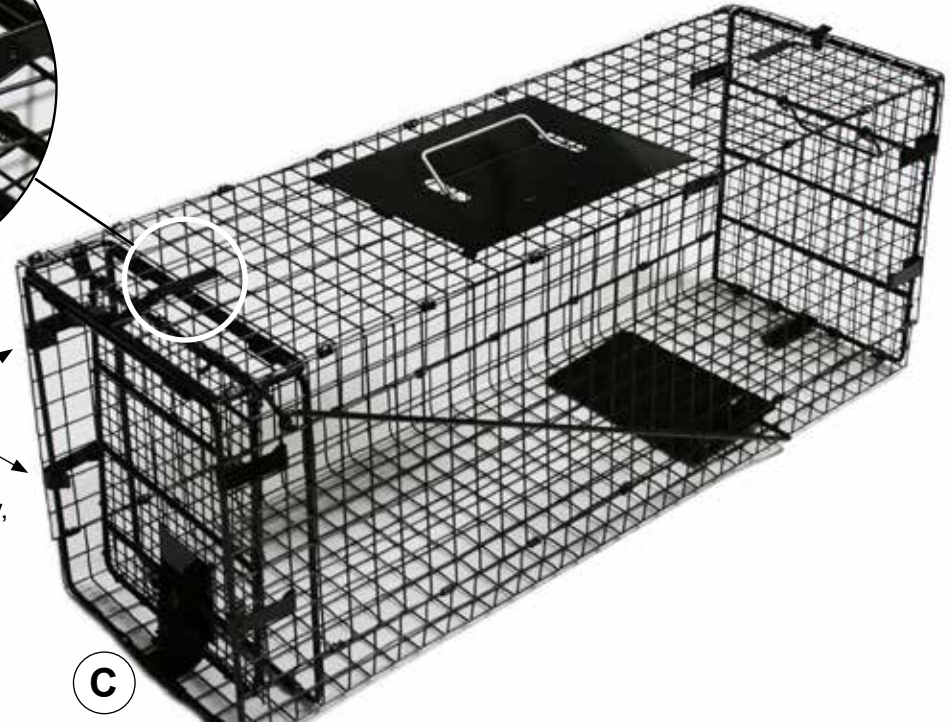

Metal Spring Latch

B

Side Tabs

NOTE: For added security, bend side tabs around the door frame using a pliers.

NOTE: Verify that the metal spring latch (top) is pressed down and behind the frame of the hinged trap door (A).

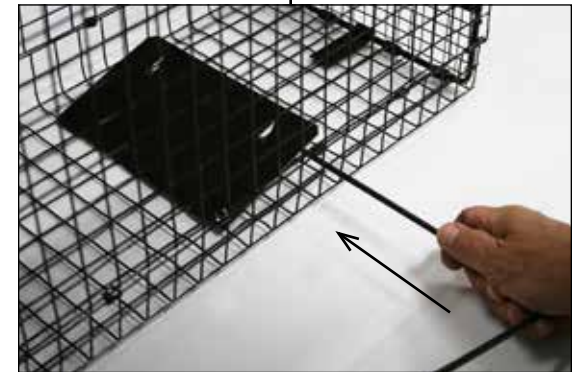

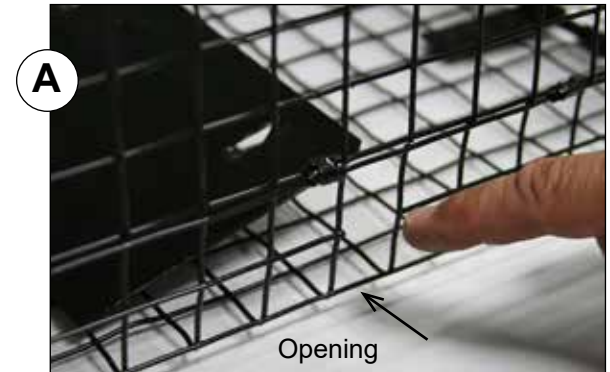

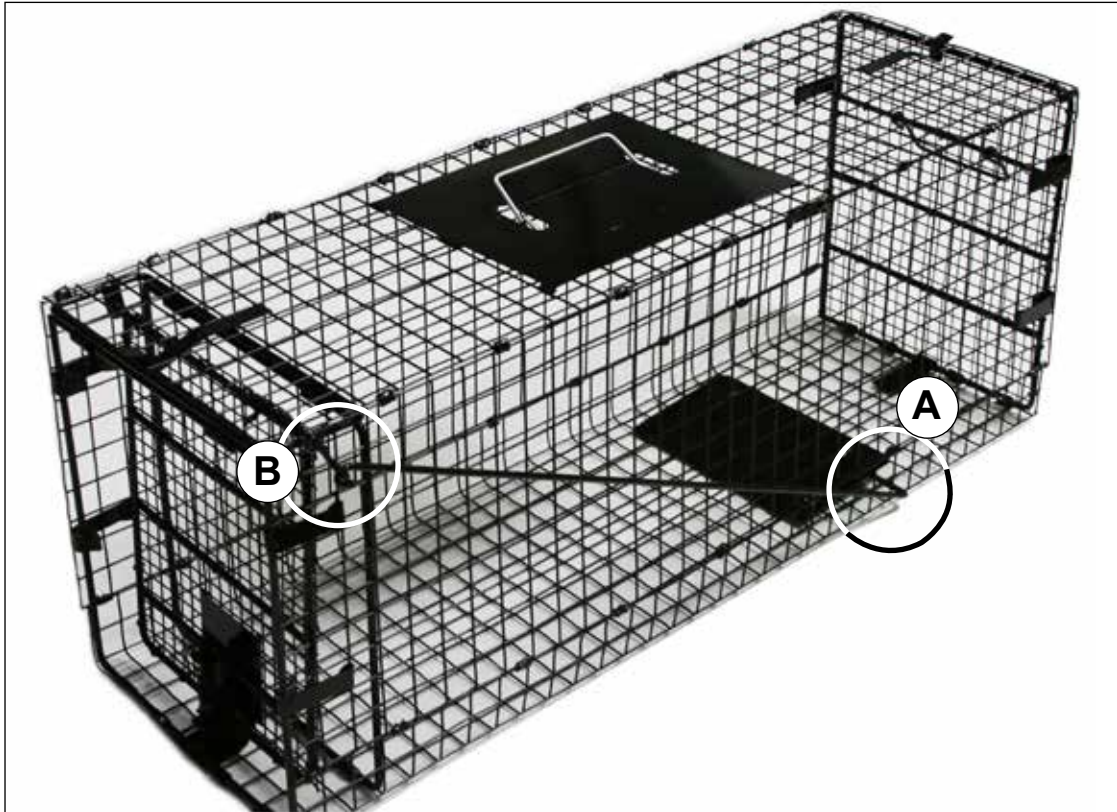

C

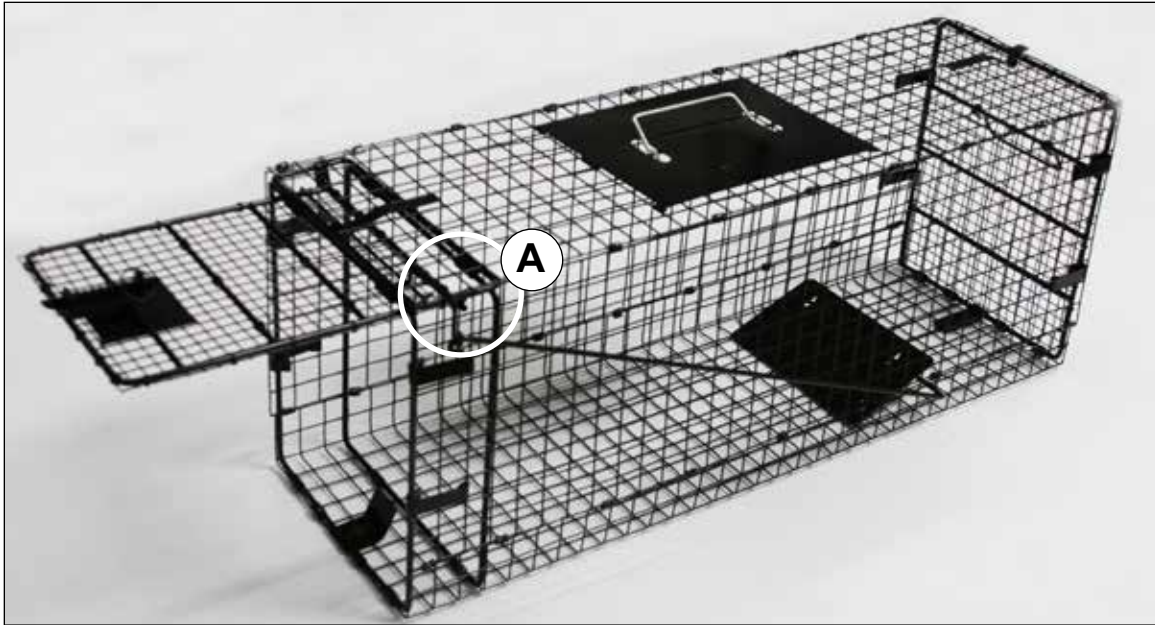

Door Stop Plate

- 5** Slide trip plate rod through opening and into the two metal ears on the underside of the trip plate (A). Attach rod at the top to the latch hook (B).

SET TRAP: Carefully lift the trap door and lock in place using the latch hook (A).

TEST TRAP: With the trap set and the opening clear, carefully press the trip plate to release the trap door. Door will swing down and lock. To reset, lift the spring-loaded latch to clear the frame and pull trap door outward.
